owner-operator of LNG carriers

“LNG operator
of the year
Maritime Asia Awards
2005 & 2006”

“Asia's best
managed
transport
& shipping
company
2006
by Euromoney”

efficient occupational,
safety & environment
practises

All MISC LNG carriers are fully ISPS compliant
& ISM Code accredited

As a global LNG transporter, we excel by performing within
stringent safety rules and regulations during operations to
ensure that the safety of our LNG carriers, crew and
surrounding environment are not compromised.

carrying more than
11% of world LNG trade.

service excellence

- designed LNG carriers based on operational feedbacks
- world's first full operational flexibility with 2 port discharges and partial deliveries
- proven expertise in evaluating and planning optimum transportation requirements
- highly qualified sea personnel graduates through our world-class training academy Malaysian Maritime Academy
- vessels compatibility with most terminals worldwide
- periodic vessels' inspection and audit ensure highest safety standards
- reliability in safe berthing and smooth cargo operations
- prolonged LNG carriers lifespan through excellent maintenance

commitment to
world-class
LNG carriers

from start till post-delivery, MISC's total project management aptitude delivers LNG carriers that are safety and quality certified

Our qualified experts work closely with ship designers, builders, equipment manufacturers and certification authorities, such as LRS, ABS, BV and NK, to ensure their adherence to strict quality and safety standards.

Furthermore, continual maintenance programmes, refurbishing and upgrading initiatives are religiously practised to prolong and enhance our carriers' current and future capabilities. Another long-term initiative, adopting the "Home Doctor Philosophy", provides repair maintenance via always-available spare maintenance support in our existing depots and ship repair yards.
